Applicant's amendment filed 12/29/03 has been entered and the Final Rejection of 9/04/03 is hereby withdrawn.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 26 is rejected under 35 U.S.C. 103(a) as being unpatentable over Furuhashi in view of Rhine.

Furuhashi teaches a direct injection system having a fuel rail, a pressure sensor and a means for damping pressure fluctuations in the rail. The fuel rail is the distributor of the system.

Rhine teaches an injection system using a flexible pipe section upstream of the rotary distributor of the system.

It would have been obvious to locate the flexible pipe upstream of the fuel rail because Rhine taught that it was known to dampen pressure waves created by an injection system upstream of the system's distributor.

Claims 13-24 and 28 are allowed.
